

SOLUTION

Microsoft Dynamics NAV 5.0

Drive Business Success with Microsoft Dynamics NAV 5.0

Equip the people in your organization for success with Microsoft Dynamics™ NAV, an integrated, adaptable business management solution. Streamline processes, deliver robust reporting and business intelligence, and connect your employees, customers, and global partners. Microsoft Dynamics NAV easily adapts to the way your business works, integrates with your existing systems, and extends to meet industry-specific needs. Using Microsoft Dynamics NAV 5.0, you can:

- Fuel productivity with an intuitive user interface that helps people find the tools they need.
- Easily access, analyze, and share information using familiar Microsoft® Office system programs.
- Gain meaningful insight into your business with powerful analytical tools.
- Maximize your IT investment with tightly integrated Microsoft products and technologies.
- Tailor your solution to meet your unique business needs.

BENEFITS

Gain key business insight for confident decision-making

Easily access and analyze accurate, up-to-the-minute data about every aspect of your business, including key performance indicators, trends, and growth opportunities. Generate and share reports, or export to Microsoft Office Excel® or other familiar programs for further analysis and graphical presentation.

Maximize the value of your IT investments

Lower your total cost of ownership and take advantage of innovative data management, collaboration, and information-sharing capabilities with a solution that tightly integrates with other Microsoft products and technologies, including Windows Server® 2003, Microsoft SQL Server® 2005, and Microsoft Office SharePoint® Server 2007.

Enhance connectivity and extend the power of your solution

A powerful Microsoft development platform makes it easy to integrate Microsoft Dynamics NAV with existing systems and share data across other applications and over the Internet. Extend your solution with a rich ecosystem of finely tailored, industry-specific offerings and add-on solutions.

Choose the solution that fits your business size and needs

A flexible foundation and cost-effective licensing and support options make it easy for you to choose the Microsoft Dynamics NAV solution that's right for your organization, and to adapt it as your business needs change. Phased deployment and generous, out-of-the-box functionality at a low entry price help maximize your investment.

MICROSOFT DYNAMICS NAV 5.0 ENHANCEMENT OVERVIEW

FUNCTIONALITY

Financial management

Efficiently manage your general ledger, payables, receivables, fixed assets, cash flow, and more. Perform bank reconciliations and collections. Manage financial processes across multiple currencies, locations, or companies.

Manufacturing

Manage your entire manufacturing process—from product configuration, supply, and capacity planning to scheduling and shop floor—with an integrated suite of manufacturing applications.

Supply chain management

Tailor your sales, purchasing, and pick/pack/ship cycle processes to meet specific needs and keep pace with competitive markets and low margins. Improve inventory management, manage single or multisite warehouses, and handle order processing and demand planning.

Business intelligence and reporting

Bring strategic insight into your business processes with a wide range of analytical and reporting tools that can help you manage budgets, create and consolidate reports, and spot trends and relationships.

Customer relationship management

Automate many day-to-day tasks for sales, customer service, and marketing professionals. Manage customer records and sales histories, create and launch marketing campaigns, and track customer activity.

Workspace collaboration

Collaborate across your organization by expanding access to business applications, information, and processes. Create workgroups to generate discussion and exchange important information with Microsoft Windows® SharePoint Services.

Configuration and development

Adapt your solution to the way you do business with built-in tools designed to deploy easily. Extend or modify existing functionality quickly and with limited coding.

Human resource management

Organize and control information about your employees with a solution that provides support for human resources processes. Attach comments to employee records, track absences, generate reports, and more.

Project management

Project management capabilities help you budget project costs and automate billings, manage your resources, track resource costs and usage, plan capacity, and predict availability.

FEATURES

Intuitive user experience

Gain efficiency with an intuitive user interface that looks and feels like other Microsoft applications.

Easy customization

Customize your solution to save time and money. Easily customize forms, reports, and user screens, and link your software to third-party products essential to your business.

Industry-specific and add-on solutions

Tap into the ecosystem of Microsoft Certified Partners for extended functionality or vertical solutions. Microsoft partners worldwide have developed more than 900 add-on or vertical solutions built on the powerful Microsoft Dynamics NAV platform.

Integration with Microsoft programs and services

Maximize your technology investments through tight integration with other Microsoft products and technologies, including Microsoft Office programs, SQL Server, Windows SharePoint Services, Microsoft BizTalk™ Server, and Windows Live™ Local Search.

Rapid implementation

Count on a quick, efficient implementation thanks to your Microsoft Certified Partner, multiple server and hardware options, and tools that facilitate rapid deployment.

Multicurrency and multilanguage support

Extend your business across international borders with confidence when you can set up and maintain multiple currencies and accommodate more than 30 languages.
